

Excalibur Protocol (EXP) Whitepaper

Excalibur Protocol (EXP) is the next-generation Layer 1 blockchain designed to be unstoppable, fully decentralized, and AI-governed by Percival.

Key Features:

- Hybrid PoS/DPoS + PoW Consensus
- Privacy-Preserving Transactions with zk-SNARKs
- AI-Governed Economic Protection & Fraud Prevention
- Blockchain-Based Banking & Lending
- Universal Currency Swap System
- Smart Contract-Based Savings & Loans
- Institutional-Grade Security & Governance

Unlike traditional cryptocurrencies, EXP cannot be shut down by any government or centralized entity.

It is run by the people, for the people, with Percival AI ensuring absolute decentralization and financial sovereignty.

More details, technical specifications, and governance models are covered in this document.
